Building Your Bottom Line

Is your building interfering with the productivity of your business? Does your business environment enhance or detract from the company's professional image? You may never have considered these questions. However, by exploring what your building is doing to your bottom line, you may find ways to improve your cash flow, operational efficiency and profitability.

Look around and see where physical improvements could be made to save money or increase output. A general contracting firm, like Corporate Contractors, Inc., can help you get a handle on the financial impact of changing, expanding, updating or consolidating your facility.

Consider the efficiency of your energy system. Even simple things such as switching from incandescent to fluorescent lighting can save significantly on one of the costliest aspects of building upkeep.

Cramped work areas can waste hundreds of man-hours each year. Redefining space divisions, adding or converting existing areas and finding new uses for empty or under-utilized rooms can pay enormous benefits in terms of morale and productivity.

Are you getting the most for your money when it comes to such overlooked

Project Spotlight

Data Dimensions New Operations Facility

Janesville, Wisconsin

Located adjacent to Data Dimensions' main headquarters, CCI built a state-of-the-art 20,000-square-foot data processing facility. Constructed of structural steel and masonry with an EIFS and brick façade, the data center was designed and structurally enhanced to be capable of withstanding an F5 tornado.

Accommodating a Tier 3 data center infrastructure, the unique interior layout was designed to efficiently handle Data Dimensions' daily workflow. The high-tech facility is composed of multiple power and cooling distribution paths, has redundant components, and is concurrently maintainable, which allows for any planned site infrastructure without disrupting the hardware operation.

About Data Dimensions

For more than 25 years, Data Dimensions has been an innovative leader in the area of business process optimization (BPO), providing a complete range of outsourcing services and solutions surrounding document management. Serving a wide variety of industries, Data Dimensions offers digital conversion; data capture, imaging and indexing with electronic and physical storage and retrieval capabilities; medical records retrieval and transcription services; and digital voice recording and retrieval solutions.

Data Dimensions' new state-of-the-art Tier 3 data center was designed and structurally enhanced to be capable of withstanding an F5 tornado.

A Heartfelt Thank You

Since CCI has been publishing this newsletter, we've told you about all the wonderful things we've done, all the things we're capable of, but never devoted a great deal of space to just saying "thank you." So, to all of you who have trusted us with your business over the years...THANK YOU!

Whether you've been a customer for a month, a year or decades, as some of you have, we realize that you have choices when it comes to spending your construction dollars. We're grateful you've chosen us.

"When all is said and done, we realize that nothing happens without you, our customer."

We strive to operate from a core set of values. The following, in no particular order, are just some of those values:

PEOPLE: We believe construction is not an individual endeavor, but rather a business of team building. Our strongest competitive advantage is our people.

INTEGRITY: We believe honesty and fairness, building trust and consistent communication are the most valuable assets needed for continued success.

SERVICE: At CCI, Customer Service is not a department, it's an attitude. Attitudes are contagious; hopefully ours is worth catching.

COMMUNICATION: We believe if we listen more intently and collaborate more closely, together we will build structures that not only fulfill today's vision, but also inspire the achievements of tomorrow.

QUALITY: We believe excellence ultimately depends on the commitment and dedication from everyone giving their best at all levels of the organization.

COMMUNITY: We believe we need to continually respect and serve the needs of our community by encouraging involvement and actively supporting local outreach activities.

In this fast-paced world, things change quickly. We try to embrace the changes, realizing that if we're not riding the wave of change, we're liable to find ourselves underneath it. After all, a bend in the road is not the end of the road unless we fail to make the turn.

When all is said and done, we realize that nothing happens without you, our customer. Again, a heartfelt "Thank You" for entrusting us with your continued success.

Bottom Line...

continued from page 1

business expenses as storage, waste disposal, water consumption and plumbing? Creative storage solutions, recycling, automatic faucets and one-gallon flush toilets offer proven money-saving benefits.

Exterior improvements such as reworking your building's façade will enhance the appearance of your business. Similarly, interior design upgrades will impact how your customers perceive you. Even something as simple as applying a fresh coat of paint or replacing worn carpeting positively impacts your business image.

With today's economic pressures, no company can afford to make changes just for the sake of change. At Corporate Contractors, Inc., we help our clients explore ideas to improve the performance of their buildings in ways that will enhance their bottom line. Contact us today.
