A New Generation of Flooring

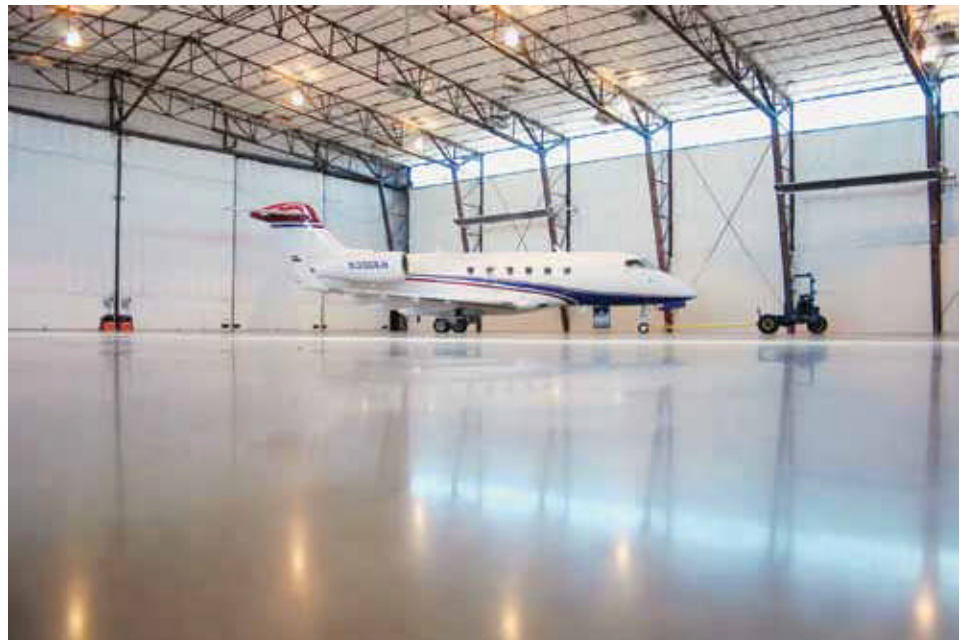

CCI, Your Polished Concrete Specialists

Innovative and economical, polished concrete floors are fast becoming the flooring system of choice for retail and manufacturing facilities, hospitals, clinics, schools, restaurants, show rooms, warehouses and garage areas. Dull, ordinary or worn-out concrete floors can be completely transformed into beautiful reflective surfaces.

Special equipment infused with industrial diamonds is utilized by CCI in a multi-step grinding and polishing process. Surfaces are ground down and polished to the desired degree of smoothness and shine. The results are permanent and durable, improving traction and resisting marks. Its high reflectivity projects a bright, clean image. Factor in the proven performance of concrete and this creates a product that is rapidly becoming the ideal floor system.

Why Polished Concrete?

Polished concrete is cost-effective, easy to maintain, environmentally friendly, and can be customized to your needs.

Rapidly becoming the ideal floor system, polished concrete is a cost-effective and environmentally friendly alternative to traditional flooring and finishes. Look to CCI to transform your new or older concrete floors into beautiful reflective surfaces that are easy to maintain.

Even better, age does not matter! CCI's process can transform new or older existing concrete floors. Second to none in durability, a concrete floor makeover can achieve appearances similar to stone, terrazzo, or even marble.

In addition to its aesthetic appeal, polished concrete floors hold up well to heavy traffic and are easy to maintain and clean. Consider the exceptional durability of concrete and it's no wonder why more commercial, industrial and institutional

facilities are opting for polished concrete. Even homeowners are catching on to the appeal of these unique floors, which can be creatively customized to meet a variety of requirements.

Realize the value of your concrete floor and capitalize on CCI's polished concrete expertise. Whether planning a new project or enhancing an existing floor, look to CCI for cost-effective, long-lasting polished concrete solutions. Give us a call today!

Siemens Power Generation: CCI accepted tight schedule requirements to successfully upgrade and expand Siemens' technologically advanced campus.

Project Spotlight

Siemens Power Generation

Fort Madison, Iowa

This significant fast-track project included a 220,000-square-foot warehouse expansion, a 37,000-square-foot office and canteen renovation/expansion, the construction of a 23,000-square-foot rail loading facility and the installation of nearly 1.5 miles of multi-track railroad spur.

Sensitive to the time constraints of Siemens, CCI accepted tight schedule requirements for the multiple improvement projects in and around their main building. While adhering to stringent safety requirements, CCI successfully upgraded and expanded nearly all of their technologically advanced campus.

The 126-acre site was once home to a semi-trailer manufacturing company. After initial renovations were complete, Siemens began producing wind turbine blades from this state-of-the-art facility more than two years ago. As an alternative to trucks, Siemens was able to transport its first shipment of blades (headed for a wind farm in Oregon) via railroad in March.

This Is A Great Time To Build!

If you or someone you know is thinking of building or renovating and want to discuss ideas with a first class contractor, please don't hesitate to contact Corporate Contractors, Inc. From design-build projects to renovations and everything in between, CCI has completed a wide array of projects, in multiple markets, both locally and across the nation. We are proud of our diversity and our reputation for delivering the results our clients expect.

Get ahead of your competition—give us a call; you'll be happy you did! Contact Brad Austin at 608-362-2912 or via email at brad.austin@cciwi.com.
