ABC Supply renovation earns award

Published: Tuesday, September 30, 2008 11:42 AM CDT

The ABC Supply National Support Center renovation project in Beloit recently received an environmental leadership award.

The Special Citation Award for Energy Efficiency was presented at the fifth annual Sustainability and Energy Efficiency Leadership Conference held in Waukesha Sept. 17. Corporate Contractors Inc. (CCI) representatives accepted the award.

"We are honored to receive this award," CCI President Brad Austin said. "This further validates CCI's commitment and passion for continued resource renewal by promoting adaptive design and reuse as well as emphasizes the importance of collaboration and incorporating sustainable construction methods on our projects."

The structure formerly housed manufacturing operations through the 1960s. It was left to deteriorate for more than 30 years before CCI initially renovated and adapted it for reuse in 1995. The continued transformation of the facility later included the installation of a roof garden, or green roof system.

This summer, CCI Project Manager Dan Baroni with Supervisor Brad Siegworth had their team convert a vacant warehouse in the north end of the facility into additional, modern office space.

The Wisconsin Sustainability and Energy Efficiency Awards recognize leadership in energy efficient and sustainable design, construction and operation of Wisconsin commercial and other nonresidential buildings and related systems.

Corporate Contractors Inc. was founded in 1982. It is a general contracting firm headquartered in Beloit.

Environmental award goes to Corporate Contractors
